**Subject:** Re: Meeting Request

This would be useful and timely. Becky please work with ORCR to get the right folks there.

Steven, to follow-up to my voice mail, I would like to schedule a meeting with you and your team and OCG (Fotouhi?) to discuss data needs to support rulemakings on clay-liner performance standards and unlined CCR impoundments that are meeting gw protection standards. We have reached out to our members and are receiving their data, and EPRI is contemplating a technical project addressing these issues, but we want to ensure that the data generated will be useful and timely.

If we can set something up later this month that would be ideal.

Jim
